SUBJECT INDEX

Acclimation,
  and heat tolerance in individual *Asellus*, 137
  and metabolic rate, haemolymph pH and total CO_2 in the crab *Stoliczia*, 49
  effect on avoidance temperature in *Procambarus clarkii*, 35
  effect on density of arteriovenous anastomoses in rat, 257
  lack of effect on final preferendum in *Procambarus clarkii*, 35
  warm effects on heart morphometry in sedentary and exercised rats, 159
Acclimatization,
  to work in the cold in man, 629
Acomys russatus, 71
Age,
  and selection of preferred temperature after heat and cold exposure, 349
  and subcutaneous fat distribution in man, 303
  and thermal comfort, 487
  effect on skin blood flow and thermal tolerance during exercise in man, 341, 605
  responses to changes in ambient temperature, 345, 355, 501
Allometry,
  and resting metabolic rate and NST in rodent species, 71
Altitude,
  effect on esophageal temperature in man, 103
  effect on sweating in man, 103
Ambient temperature,
  and contraction of frog skeletal muscle, 53
  and regulation of thoracic temperature in flight in a beetle, 25
  effect on body temperature in febrile and control rats, 7
  effect on metabolic rate and evaporative water loss in a scorpion, 13
  effect on metabolism, haemolymph pH and total CO_2 in a crab, 49
  high and intestinal morphology and function in rats, 145
  in galls and effect on *Eurosta solidaginis* overwintering larvae, 125
  responses to changes in by the aged, 345, 355
Amphibia, 53, 223
Antibody,
  to HSP70 and heat resistance in CHO cells, 229
Arachnid, 13, 263
Arteriovenous anastomoses,
  effect of warm rearing and acclimation on density of in rats, 257
  in the hand during cooling and warming and exercise in man, 237, 325
Asellus aquaticus, 137
Avoidance temperature,
  effect of acclimation on in *Procambarus clarkii*, 35

BAT,
  in neonatal rabbit, 189
Behavioural thermoregulation,
  in *Podarcis muralis*, 19
Bird, 117, 275
Blood flow,
  ethnic differences in, 299
  forearm and sweating rate in man during exercise, 237, 325
  skin in aged man, 345
Body temperature,
  and altitude in man, 103
  and ambient temperature in febrile rats, 7
  and ambient temperature in the elderly, 355
  and brooding in nestling white-crowned sparrows, 117
  and dehydration in *Bufo*, 223
  and local skin cooling in man, 335
  and morphology in *Sparrmannia flava*, 25
  and pyrogen administration in naked mole rats, 245
  during exercise in man, 203, 605
  during hyperthermic stress in rats, 1
  effect of age on during exercise in man, 341, 605
  in *Plecotus auritus*, 131
  intraspecific variation of in *Podarcis muralis*, 19
  of man measured with heat flux meter, 473
  of the elderly, 501
  regulation of in a beetle in flight, 25
  regulation of in man, theoretical model of, 307
  with and without protective clothing during work in the cold, 639
Breathing pattern,
  studies on in man, 623
Bufo valliceps, 223

Calcium channel,
  antagonist and effect of cooling on frog muscle contraction, 53
Cardiac muscle,
  function during freezing and thawing in turtles, 91
  morphometry in warm and normothermic exercised and sedentary rats, 159
Cardiovascular responses,
  in furnace workers using different clothing types, 677

to altitude and body temperature in man, 103
to exercise in man, 609
Chelydra serpentina, 185
Chlorpromazine,
and protection of erythrocyte membrane from heat damage, 83
CHO cells,
and studies on mechanism of glycerol protection of hyperthermic damage, 41
heat sensitivity and HSP70 and anti-HSP70 antibodies, 229
Chrysemys picta, 91
Clothing,
and cold stress in polar environments, 629
and heat transfer in man, 405
and operative temperature in man, 551
and sweating rates in Europeans, 293
development of a dynamic model of for temperature, 413
effect of fabric type on skin temperature and moisture, 421
influence on thermoregulatory factors in man, 307
insulation value of measured with heat flux meter, 473
method for evaluating insulation value of in the cold in man, 643
microclimate simulator of, 429
multiple layers and heat and moisture transfer, 435
protective and work in repetitive cold exposure, 639
Clutch size,
effect on heat transfer in nestling white-crowned sparrows, 117
Cold adaptation,
question of basis of in man, 629
Cold exposure,
effect on thermal responses to work and rest in wind and radiation in man, 633
in a turtle and cardiac and skeletal muscle contractility, 91
repetitive and value of protective clothing, 639
survey on amongst cold storage workers, 647
Cold stress,
and work in polar environments, 629
effect on BAT 5′-monodeiodinase activity in neonatal rabbit, 189
methods of assessment of extent of in man, 643
Cold tolerance,
and thermogenic capacity in *Junco* and tree sparrows, 275
of wolf-spiders, 263
Convective heat transfer,
estimations of for man, 455
Cooling,
and selection of preferred temperature in the elderly, 349
curve for *Sparrmannia flava*, 25
effect of local on skin temperature and body temperature, 335
effect of vegetation in an urban environment, 571
effect on contraction of frog muscle, 53
Critical thermal maximum,
of *Asellus aquaticus*, 137
Crustacea, 35, 49, 137
Cytokines,
synergysm with hyperthermia in killing HT-29 and MCF-7 cells, 269

Dehydration,
and stimulation of behavioural hypothermia in *Bufo*, 223
Development,
of thermoregulation in rodents, a mathematical model, 113

Electrocardiogram,
of turtle heart during freezing and thawing cycles, 91
Endothermy,
in *Sparrmannia flava*, 25
Endotoxin,
and fever in rats, 7
Energy,
conservation and indoor air quality, 541
saving of by thermolability in bats, 131
Environment,
evaluation of by real time monitoring standard effective temperature, 561
home, methods for control of, 577
indoor, criteria for comfortable conditions in, 545, 555
office and worker fatigue, 565
stressful and work in, in man, 633, 639, 647, 659, 677, 683, 687
Erythrocyte,
cholinesterase activity in humans and pyridostigmine, 103
heat-induced damage to membrane, 83, 177
Eurosta solidaginis, 125
Evaporative water loss,
and the quality of clothing in man, 405
effect of ambient temperature on in a scorpion, 13
effect of fabric type on, 421
ethnic differences in, 285
skin wettedness and thermal comfort in man, 449
Exercise,
age and thermoregulation in man, 341

at sea level and altitude, effect on skin and body temperature, and heart rate, 103
effect on cardiac output and oxygen uptake in man, 609
effect on forearm heat loss in man, 237, 325
effect on heart rate and body temperatures in man, 203, 307, 633
effect on pulmonary gas exchange kinetics in man, 599
in the cold in man, 633
lactate response to and endurance training in man, 617
modelling biochemical indices of during endurance training, 587
prevents myocardial pathology in warm acclimated rats, 159
prolonged, thermal limits for in man, 605

Fever,
and resting metabolism in rats, 7
demonstration of development of in naked mole rats, 245
Fish, 197
Freezing,
effect on cardiac and skeletal muscle in a turtle, 91
in *Eurosta solidaginis* larvae inhabiting galls, 125
in over-wintering hatchling turtles, 185

Gonad development,
photoperiod/temperature control of in *Plecoglossus*, 197
Glycerol,
and protection from hyperthermic damage in CHO cells, 41

Haemolymph pH,
and ambient temperature in a crab, 49
Heat damage,
of proteins, protection from by HSP, 165
protection from by chlorpromazine in erythrocytes, 83
study of using a turbimetric assay for protein aggregation in CHO cells, 41
to mammalian erythrocytes, relationship to membrane lipid composition, 177
Heat flow,
model for effect of clothing on, 413
Heat flux meter,
use in physiological measurements, 473
Heat gain,
estimations of in endothermic bats, 131
Heat load,
in exercise and hand blood flow in man, 325
Heat loss,
comparison of in young and elderly man, 355, 605
convective, estimation of in man, 455
from forearm, effect of temperature of returning venous blood from hand on, 237
in control and febrile rats, 7
in nestling altricial birds, 117
model for prediction of in man, 439
radiant and convective in endothermic bats, 131
via abdomen in flight at high ambient temperature in a beetle, 25
Heat production,
as a function of ambient temperature in man, 307
comparison of in young and elderly man during exercise, 605
in control and febrile rats, 7
in rodents in relation to allometry, 71
model for prediction of in man, 439
Heat resistance,
role for HSP70 in CHO cells, 229
Heat shock proteins,
antibody to and heat resistance in CHO cells, 229
protection from hyperthermic damage in CHO cells by, 229
protection of heat-induced protein aggregation by, 165
Heat stress,
acute effect on intestinal morphology and function in rat, 145
and use of personal air conditioners during work in, in man, 683
and work-wear design for furnace workers, 677
tolerance of during exercise in aged man, 341
Heat tolerance,
individual in *Asselus* during acclimation, 137
Heat transfer,
effect of clothing on in man, 405, 435, 551
in nestling white-crowned sparrows during brooding and parental inattention, 117
Heating,
rate of in *Podarcis muralis*, 19
Heterocephalus glaber, 245
HT-29 cells, 269
Humidity,
effect on fabric surface temperature with different fabric types, 429
effect on thermal sensation in man, 387
transfer and multiple clothing layers in man, 435
Hyperthermia,
and haemolysis of erythrocytes, 177
and thermal preference in rats, 1
synergistic effects with cytokines in killing HT-29 and MCF-7 cells, 269

Ice formation,
and cardiac and skeletal muscle function in turtles during freezing and thawing, 91

in hatchling turtles overwintering in natural nests, 185
Insect, 25, 125
Insulation,
development of and heat transfer in a nestling bird, 117
value and clothing, 405, 409
Intestine,
affect of heat stress on morphology and function of in rats, 145

Junco hyemalis, 275

Lactate response,
modelling of in endurance training in man, 617
Lipids,
fluidity of erythrocyte membrane during heating, 83
membrane composition and thermohaemolysis in erythrocytes, 177

Mammal, 1, 7, 61, 71, 103, 113, 131, 145, 153, 159, 177, 189, 203, 211, 237, 245, 251, 257, 285–687
Man, 103, 203, 237, 285–687
MCF-7 cells, 269
Melatonin,
effect on BAT 5′-monodeiodinase activity in cold stressed neonatal rabbit, 189
Membrane,
erythrocyte and heat damage, 83, 177
Metabolic rate,
and ambient temperature in a fruit-bat, 61
and parental heat gain by nestling white-crowned sparrows, 117
effect of ambient temperature on in a crab, 49
effect of ambient temperature on in a scorpion, 13
resting in febrile rats, 7
resting in rodent species from arid and semi-arid habitats, 71
Microclimate,
in galls and effects on larvae of *Eurosta solidaginis*, 125
MnSOD gene,
expression of and synergistic cytotoxic effects of hyperthermia and cytokines, 269
Model,
for effect of clothing on heat flow, 413
for evaluation of human environment, 443
for plasticity of response to endurance training in man, 587
for pulmonary gas exchange during exercise in man, 599
heat flux for endothermic bats, 131
mathematical of post-natal development of thermoregulation in rodents, 113
mathematical of thermoregulatory system in man, 307, 439
of convective heat transfer in man, 455
of lactate response to endurance training in man, 617
5′-monodeiodinase,
activity in BAT of neonatal rabbit, 189
Morphometric studies, 145, 159
Mouse, 113
Muscle,
and the inotropic effect of cooling, dependency on extracellular calcium, 53
cardiac and skeletal effect of freezing and thawing on in turtles, 91
mass and ageing in humans, 303
Mus musculus, 113

Nest,
contact and heat transfer in an altricial bird, 117
ecological significance of in rodents, 71
overwintering and freezing injury in hatchling turtles, 185
Noradrenalin (norepinephrine),
effect on 5′-monodeiodinase activity in BAT of neonatal rabbit, 189
Nucleus raphe magnus,
modulation of dorsal horn cells response to skin warming and cooling, 211

Occupational health,
studies on in man, 651, 659, 665, 671, 677, 683, 687
Office environment, 523, 533
Operative temperature,
in resting and flying beetles, 25
of man from mannikin studies, 329, 551
use in thermal comfort studies, 551
Oxygen consumption,
and ambient temperature in crab, 49
and ambient temperature in a scorpion, 13

Papio hamadryas, 153
Pardosa pullata, 263
Photoperiod,
and temperature in control of ovarian development in *Plecoglossus*, 197
Plecoglossus altivelis, 197
Plecotus auritus, 131
Podarcis muralis, 19
Preferred temperature,
and dehydration in *Bufo*, 223
during hyperthermic stress in rats, 1
in acclimated juveniles, preadults and adult *Procambarus clarkii*, 35
in the elderly after cold and heat exposure, 349
Procambarus clarkii, 35

Protein aggregation,
heat induced in CHO cells, a turbimetric study, 41
protection from during heating by HSP, 165
Proteins,
heat-induced conformational change of in erythrocytes, 83

Q_{10}, 7, 49

Rana pipiens, 53
Rat, 1, 7, 145, 159, 211, 251, 257
Reptile, 19, 91, 185
Rousettus aegyptiacus, 61

Salivation,
and hyperthermia in rats, 1
Selected temperature,
in rats during hyperthermic stress, 1
Skin temperature,
and clothing type in man, 409
and exercise in aged man, 341, 605
during prolonged exercise, effect of age on, 605
effect of fabric type of cloth on, 421
effect of hyperbaric hypoxia on in man, 103
effect of wind and radiation on during work and rest in the cold, 633
effect on temperature responsive cells in dorsal horn cells and modulation by raphe-spinal and subcoeruleo-spinal stimulation, 211
ethnic differences in, 299
in relation to thermal comfort in man, 329
in the elderly, 501, 605
local cooling of and thermal sensation in man, 335
regional in man, 307, 325
relationship to standard effective temperature in man, 561
response to step-changes in air temperature in man, 377
response to work in the cold with and without protective clothing, 639
Spalax ehrenbergi, 71
Sparrmannia flava, 25
Spizella arborea, 275
Stoliczia abbotti, 49
Supercooling points,
of wolf-spiders, 263
Sweating,
decline in rate of in aged man, 345
during prolonged exercise, effect of age on in man, 605
effect of hyperbaric hypoxia on in man, 103
ethnic differences in thermal stress, 285
from forearm and exercise in man, 237, 325
rates in Europeans and clothing and the environment, 293
Standard effective temperature, 551, 561
Stoliczia abbotti, 49

Temperature control,
fuzzy for air conditioning, 465
Thermal comfort,
and ambient temperature in handicapped man, 363
and ambient temperature in man, 307
and indoor air quality, 513, 519
and skin temperature in man, 329, 449
and skin wettedness, 449
and sleep quality in bed, 393, 399
and step-change in air temperature, 377
ethnic differences in sensation of, 299
evaluation of for the elderly, 487
heating systems and the disabled, 289
method for estimation of, 551, 561
studies on with handicapped, 363
Thermal conductance,
in control and febrile rats, 7
Thermal environment,
and thermal comfort in the elderly, 501
evaluation of in offices, 523
formulation for standards in for the elderly, 487
home and incidence of cerebrovascular disease, 481
model for evaluation of in humans, 443, 561
modelling for the handicapped, 363
national survey of in the homes of aged Japanese, 487
of cave dwellings in China, 477
personal during work in a stressful, 683
Thermal radiation,
effect of on thermal response to work in the cold, 633
Thermal structure,
of a heated room, 459
Thermogenic capacity,
and cold tolerance in dark-eyed Juncos and tree sparrows, 275
Thermogram,
use of in man to measure heat loss from forearm, 237
Thermoneutral zone,
of the fruit-bat *Rousettus aegyptiacus*, 61
Thermoregulation,
behavioural during hyperthermic stress in rats, 1
effect of water restriction on in a fruit-bat, 61
in an altricial bird during development, 117
in flight in a beetle, 25
in *Podarcis muralis*, 19
in the elderly, 501
model of and characteristics of in man, 307
role for nucleus raphe magnus and subcoeruleus region in, 211

Thermoregulatory set-points,
intraspecific variation of in *Podarcis muralis*, 19
Thermosensation in man,
during work and rest in the cold in man, 633
effect of humidity on, 387
effect of local skin cooling on, 335
evaluation of a method for discriminating in thermal environments, 381
in the elderly, 345, 355
methods for evaluation of, 551
to a step change in air temperature, 377
Thyroid gland hormones,
serum levels in cold stresses neonatal rabbit, 189
Turbimetric assay,
for heat-induced protein aggregation and HSP protection, 165
for heat-induced protein aggregation in CHO cells, 41

Urodacus armatus, 13
UV rays,
exposure to during sports activity, 583

Vasomotor responses,
to cold exposure in man, 629
Villus,
intestinal morphology in heat stressed rats, 145

Warm rearing,
effect on density of arteriovenous anastomoses in rats, 257
effect on development of thermolytic organs in rats, 251
Water conservation,
during water deprivation in summer in the baboon, 153
Water loss,
and dehydration and body temperature in *Bufo*, 223
Water restriction,
effect on thermoregulation in a fruit-bat, 61
effect on water economy in the baboon, 153
Wettedness,
of skin and thermal comfort, 449, 551
of skin in relation to standard effective temperature, 561
Wind,
effect on thermal responses to during exercise and work in the cold, 633

Zonotrichia leucophrys, 117
